Art Unit: 1732

DETAILED ACTION

1. The objection to the disclosure and the rejection of claims 4; 6, 20-22, 26, 28, 31 and 33 under 35 USC § 112, second paragraph set forth in the previous Office Action (mailed on 26 August 2003) are with drawn.

Drawings

2. The drawings were received on 19 December 2003. These drawings are accepted.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by Reinehr et al (DE 19504316 C1).

Reinehr et al (see the entire document, in particular, Tables 1-4) teach elastane fibers having a titer of up to 10,000 dtex (i.e., a titer less than, or equal to, 10,000 dtex), fiber (or tensile) strengths of 0.5 to 0.95 cN/dtex and an elongation at tear (or break) of 500 to 750%. Note that claim 14 is a product-by-process claim, and even though product-by-process claims are limited by and defined by the process, the determination of patentability is based on the product itself and

does not depend on its process of production (*In re Pilkington*, 411 F.2d 1345, 162 USPQ 145 (CCPA 1969); *In re Marosi*, 710 F.2d 799, 218 USPQ 289 (Fed. Cir. 1983); *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985)).

Allowable Subject Matter

5. Claims 1-13 and 15-33 are allowable over the prior art references presently of record.

Response to Arguments

6. Applicant's arguments filed on 19 December 2003 have been fully considered but they are not persuasive. Applicant argues (pages 9 and 10) that the fibers of instant claim 14 incorporate waste material and the prior art references presently of record do not suggest or teach elastane fibers which comprise waste material. Examiner responds that the fibers of instant claim 14 are made from waste elastane fibers (i.e., the waste material is waste elastane fibers). In the instant process, these waste elastane fibers are processed into an elastane spinning solution, fresh elastane spinning solution may be (optionally) added thereto, and this elastane spinning solution is dry-spun or wet-spun to make elastane fibers. Thus, the fibers of instant claim 14 are elastane fibers, and whether the elastane spinning solution is made from waste elastane fibers, or from fresh elastane spinning solution, or from both, the composition of the fibers of instant claim 14 is still elastane. Reinehr et al teach elastane fibers as set forth in instant claim 14.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
